

## **FOR IMMEDIATE RELEASE:**

### **D.I. Roof Seamers proudly introduces the Contractor Series Select Kit.**

Corinth, MS, October 2, 2015 — D.I. Roof Seamers proudly introduces the Contractor Select Kit. This Roof Seamer was designed in 2010 to benefit contractors and builders who work with portable roll formers and want ability to own a roof seamer without a large capital investment. The "Select Kits" are tooling kits that are sold with the roof seamer providing tooling conversions for 1", 1.5" and 2" roof panels that can be formed in 90° or 180° seamed profiles. Simply change the tooling on your jobsite to fit most any panel you are working with. Bi-directional option available when seaming 90° profiles.

The machine is self-propelled with hands free operation. Built with a durable 9 amp/115 volt/60 cycle electric motor, it is equipped with a quick-disconnect plug for added safety and an onboard hour meter to keep track of usage and maintenance. Recommended for use with 24 gauge steel panels maximum, the machine is exceptionally lightweight, fast and comes with a 6 month manufacturer's limited warranty.

Purchase price for the roof seamer and Select Kit is \$3,600 USD which includes the roof seamer, the Select Kit of your choice and a heavy-duty storage case to protect equipment against rugged job site conditions. The other Select Kits can be purchased separately for \$500 USD. For more information, visit us at [www.diroofseamers.com](http://www.diroofseamers.com)
